SN Control Hub – Initial Test

Summary

#	Fix first		#	Improve
1	AUD receipts treated as foreign currency		8	To review: one list
2	Two Expenses pages		9	Double navigation
3	Old records kept old categories		10	Overview defaults and FX card
4	Paid with / Payment / Receipt stuck on Unknown		11	Totals for filtered lists
5	Matching doesn't update Payment		12	Color-coded statuses
6	Business purpose is optional		13	Form layout
7	Receipt quality check inconsistent		14	Subscription currency
			15	More property fields
			16	Pop-up opens off-screen
			17	One date format

Fix first

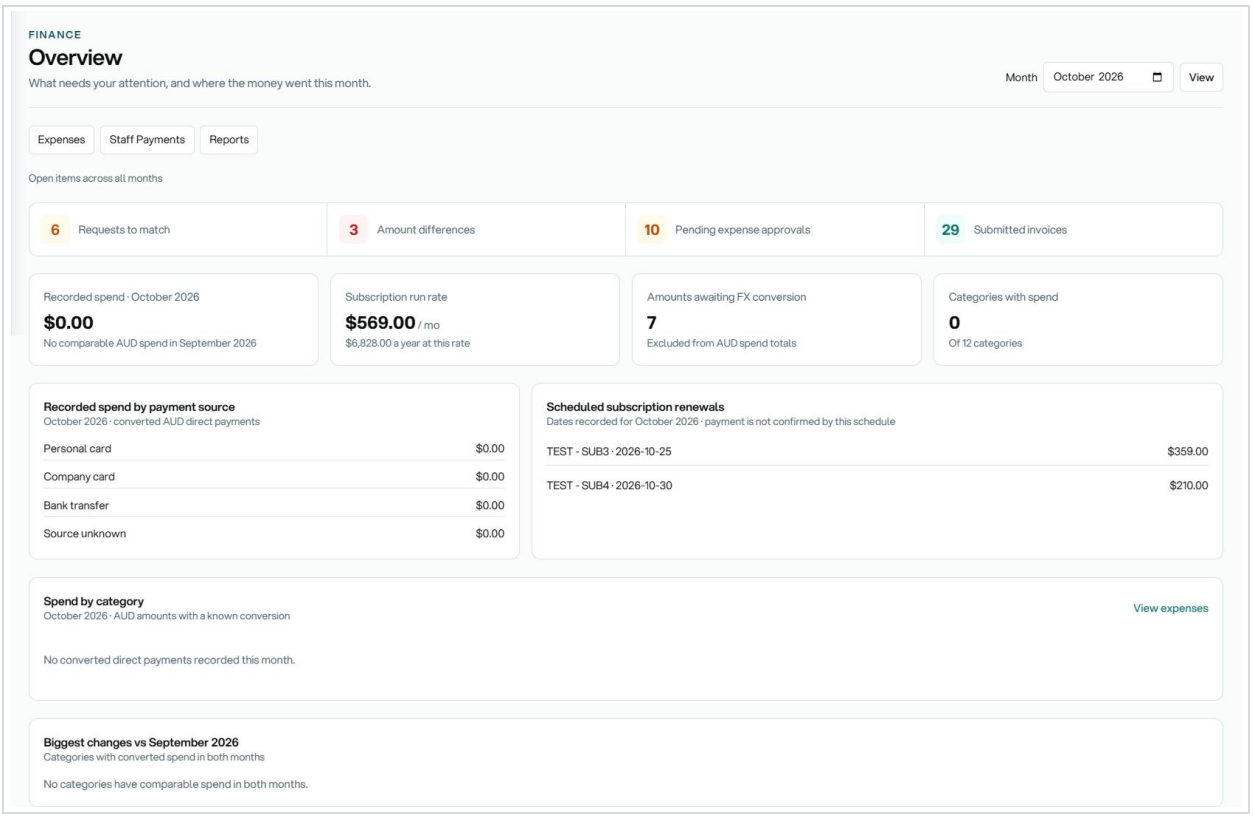

1. AUD receipts treated as foreign currency

Where: Finance Overview

Problem: AUD receipts are counted as "awaiting FX conversion", so they're left out of every total. Recorded spend shows $0.00 and Spend by category is empty, even though every test receipt is in AUD.

Fix: AUD amounts go straight into AUD totals. Only non-AUD amounts need conversion (e.g., USD)

Note: *The saved Reports snapshot did total AUD 4,035.10 for October, so Reports may already be fine and only Overview is affected (?).*

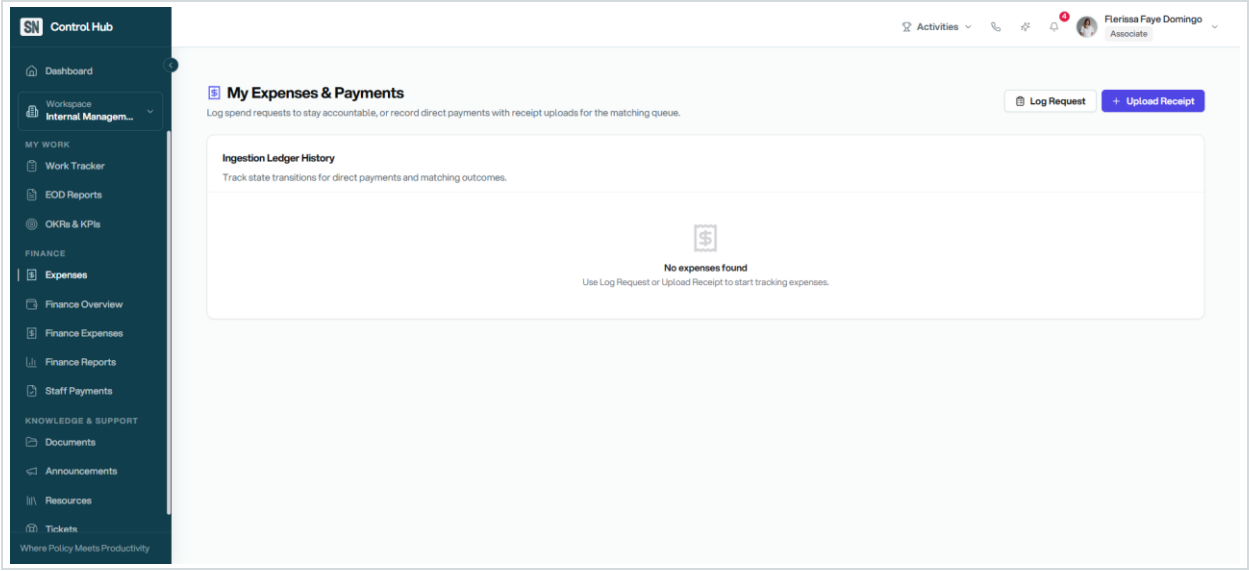

Overview, October 2026: Recorded spend $0.00, 7 amounts "awaiting FX conversion", 0 categories with spend (tests T9, T10)

2. Two Expenses pages

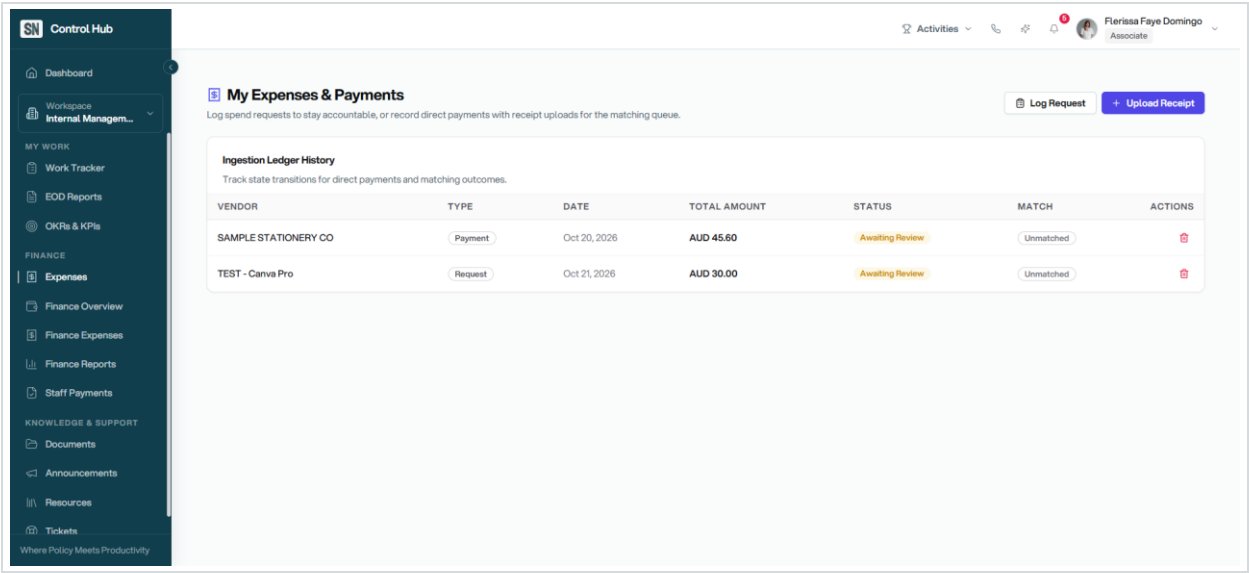

Where: Sidebar

Problem: There are two Expenses pages: "Expenses" (the old My Expenses & Payments) and "Finance Expenses". The "New expense" button also opens the old page.

Fix: Keep one Expenses entry. If staff need their own page, call it "My Expenses" and show the Finance pages to Finance/admin only.

Sidebar shows both "Expenses" and "Finance Expenses"; "Expenses" opens the old My Expenses & Payments page

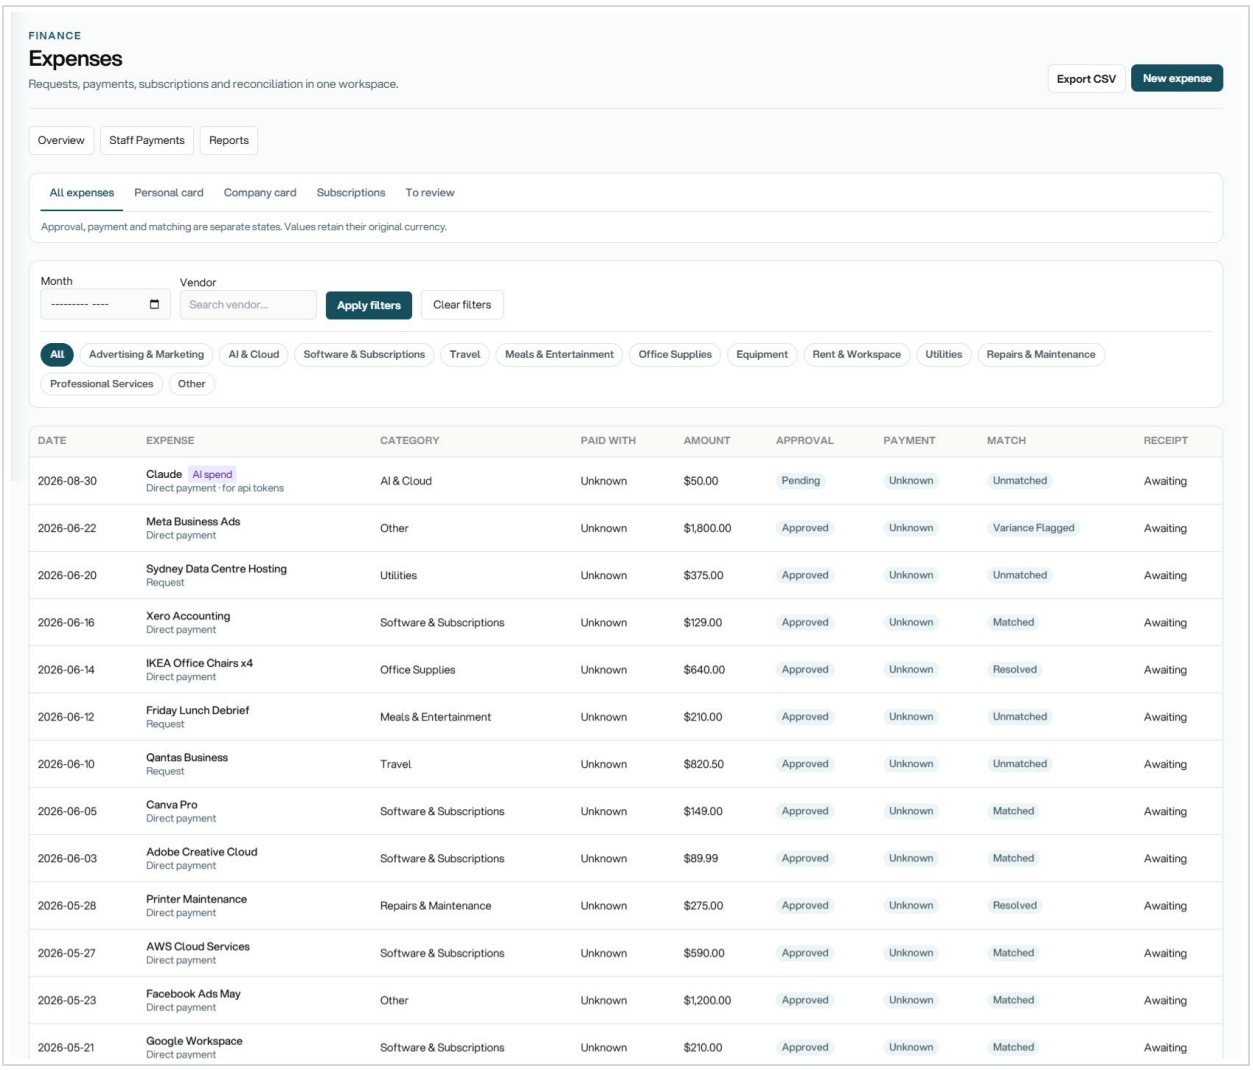

"New expense" on Finance Expenses opens the old My Expenses & Payments page

3. Old records kept their old categories

Where: Finance Expenses › All expenses

Problem: Older records weren't re-sorted into the new categories. Meta Business Ads and Facebook Ads are still "Other".

Fix: Re-map: Ads → Advertising & Marketing; Sydney Data Centre + AWS → AI & Cloud; Coworking → Rent & Workspace; chairs and desks → Equipment.

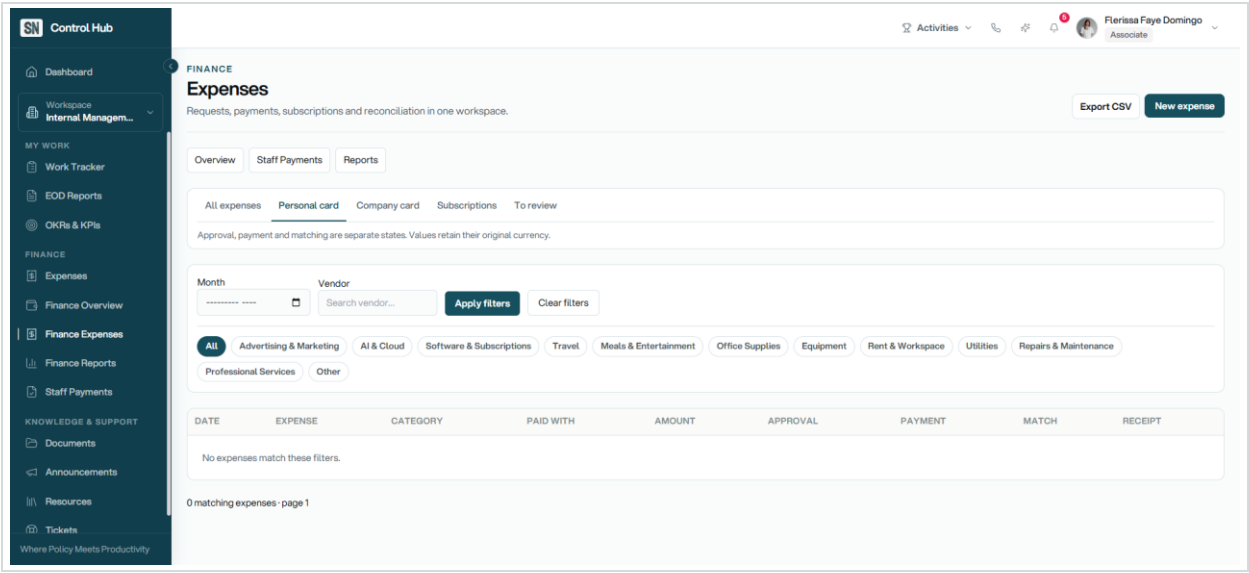

All expenses: Meta Business Ads and Facebook Ads still under "Other"; AWS under Software; Data Centre and Coworking under Utilities; chairs and desks under Office Supplies

4. Paid with / Payment / Receipt stuck on Unknown

Where: Finance Expenses › All expenses, Personal card, Company card

Problem: Every older row shows Paid with = Unknown, Payment = Unknown and Receipt = Awaiting. Because of this, the Personal card and Company card tabs are empty for past months.

Fix: Keep Unknown until checked, but make these fields editable so Finance can fill them in.

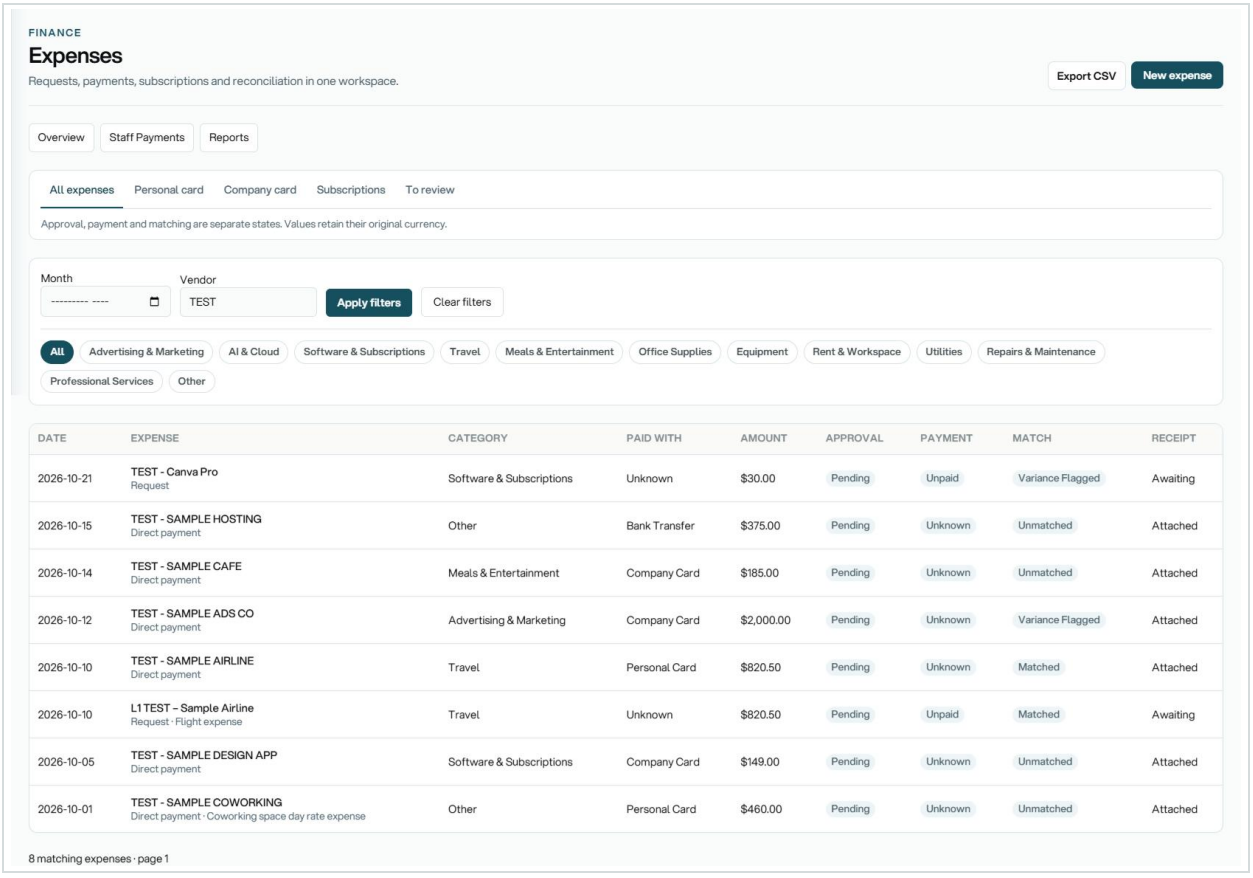

Personal card tab: no rows, because older expenses have Paid with = Unknown

5. Matching doesn't update Payment

Where: Finance Expenses › All expenses, To review

Problem: Matched rows still show Payment = Unknown or Unpaid. Some show "Resolved" as a match status. The match result is picked by hand from a dropdown, so the status doesn't follow what was actually matched.

Fix: A match should set Payment = Paid. Match status should only be Matched / Unmatched / Amount differs.

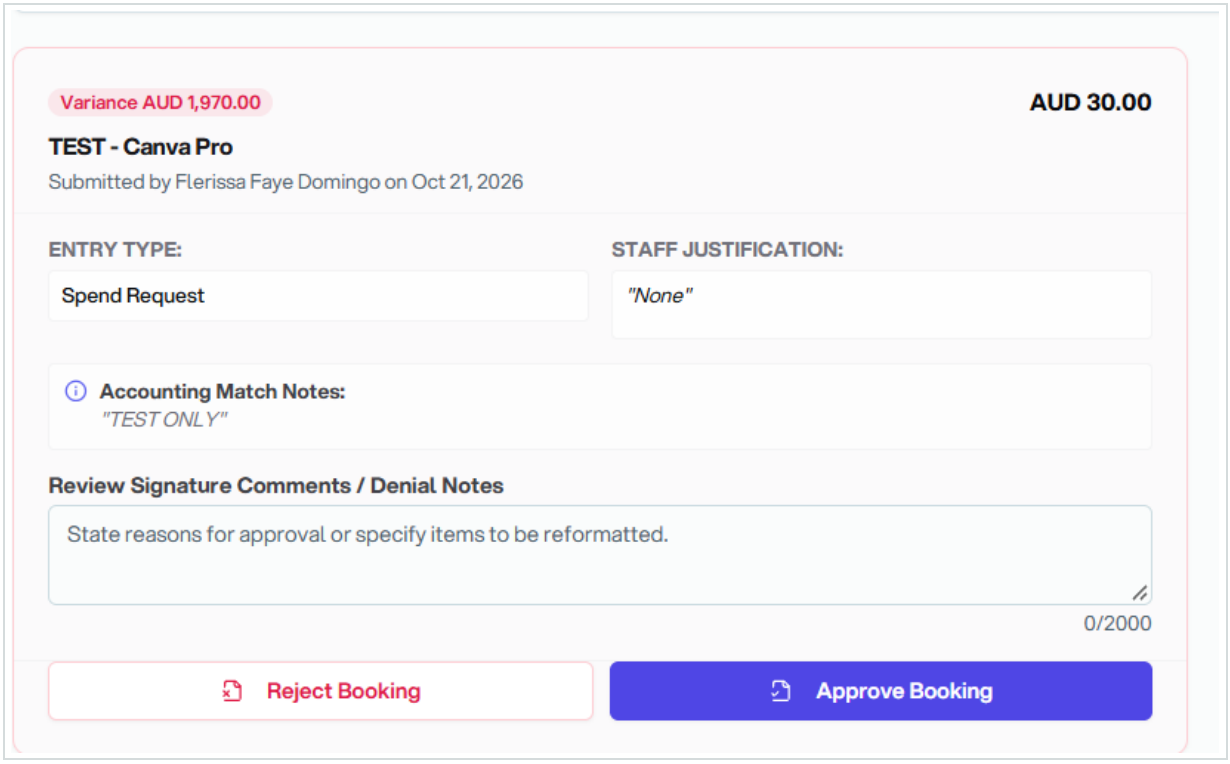

All expenses (Vendor: TEST): "TEST – Sample Airline" and "L1 TEST – Sample Airline" are Matched but Payment is Unknown / Unpaid (test T4)

6. Business purpose is optional

Where: Log Request, Upload Receipt

Problem: Both forms save with no business purpose or justification. The reviewer then sees "None".

Fix: Make it required on both forms.

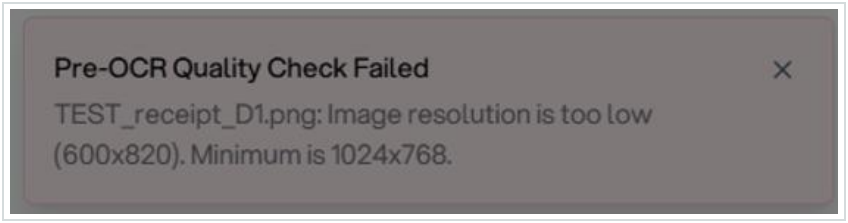

Review screen for TEST – Canva Pro: Staff justification "None" (tests T1, T4, T5)

7. Receipt quality check inconsistent

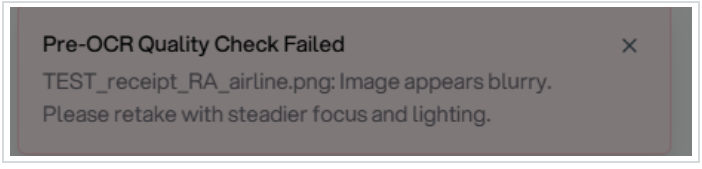

Where: Upload Receipt

Problem: The quality check rejected clean digital receipts as "blurry". The same receipt layout passed once and failed later. The 1024×768 minimum may also reject portrait phone photos.

Fix: Loosen the blur check for digital receipts. Check the long side against 1024 and the short side against 768.

First test receipt (600×820) rejected for resolution (test T2)

A clean 1240×1754 test receipt rejected as "blurry" (test T2)

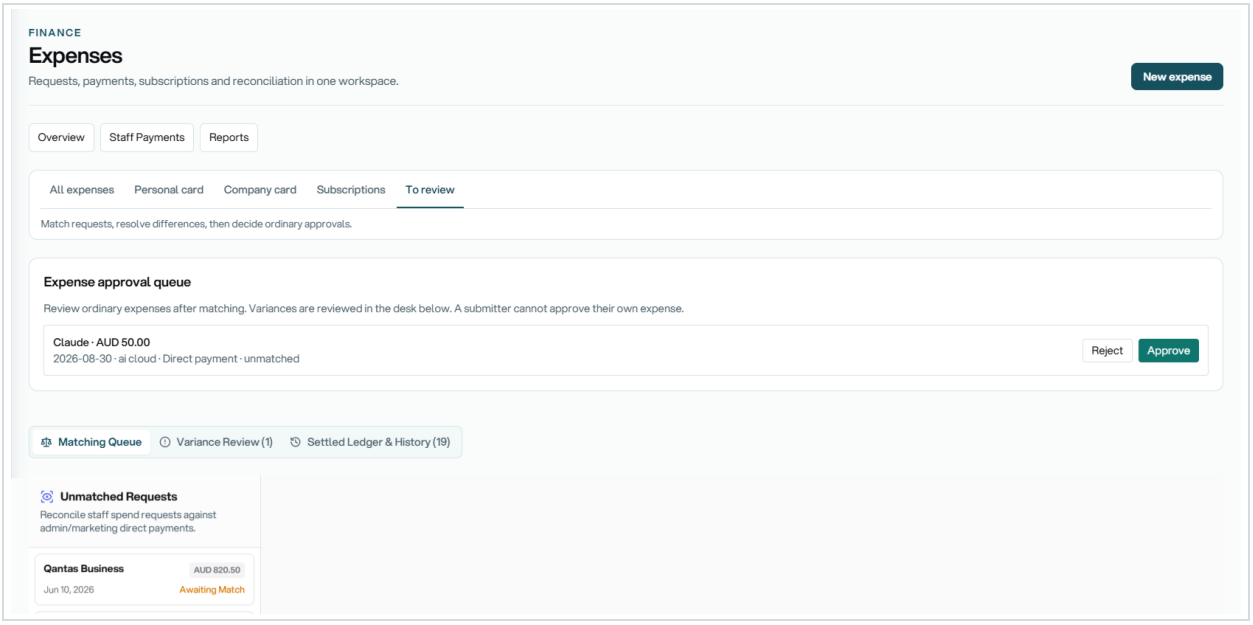

Improve

8. To review: one list

Where: Finance Expenses › To review

Problem: Approvals, Matching Queue, Variance Review and Settled Ledger sit in separate boxes and tabs. The category shows as "ai cloud".

Change: One list in this order: amount differences → approvals → matches. Move Settled Ledger to All expenses. Show "AI & Cloud", not "ai cloud".

To review: approval queue on top, then separate Matching Queue / Variance Review / Settled Ledger tabs; Claude shows as "ai cloud"

9. Double navigation

Where: Finance pages

Problem: The sidebar and the buttons at the top of the page (Overview / Staff Payments / Reports) do the same thing.

Change: Keep one. If the buttons stay, highlight the current page. Drop "Finance" from "Finance Overview / Expenses / Reports" in the sidebar.

Screenshot: *sidebar under Fix 2; page buttons in any Finance screenshot.*

10. Overview defaults and FX card

Where: Finance Overview

Problem: Overview opens on a month with no data. Subscription run rate depends on tools being flagged as recurring. The FX card only shows a count ("7"), not the amount.

Change: Open on the latest month with data. Flag recurring tools so run rate isn't $0. FX card: show the amount and currency, not just a count.

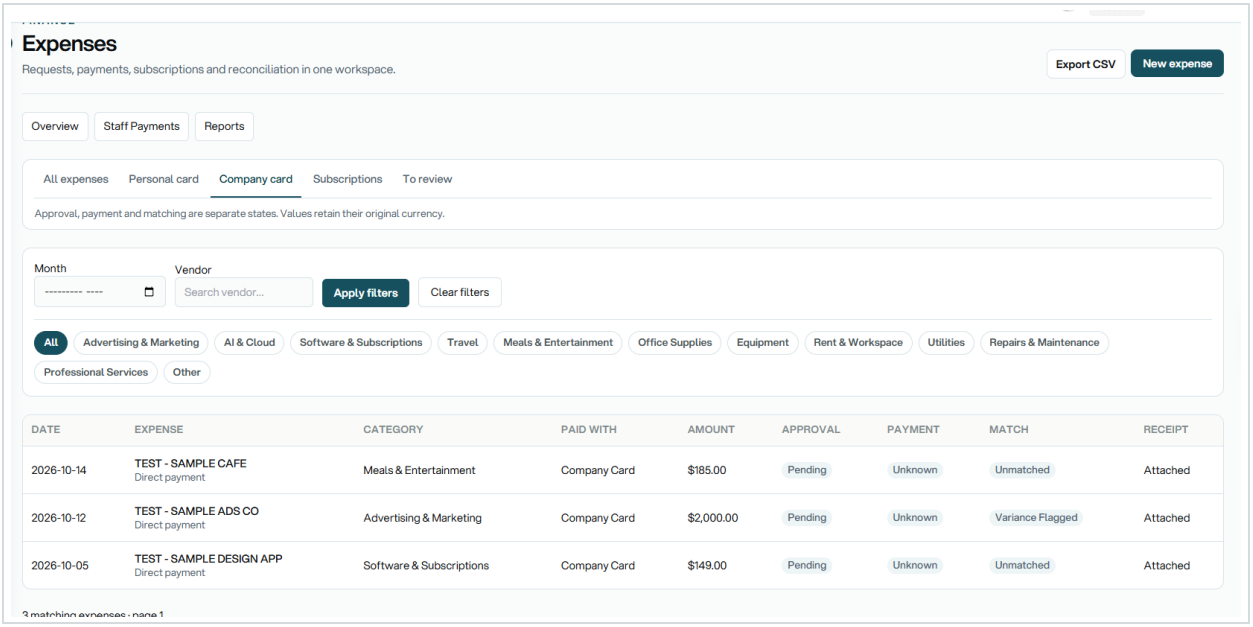

Screenshot: *Overview under Fix 1 (test T9).*

11. Totals for filtered lists

Where: Personal card, Company card, Maintenance list

Problem: The tabs show the right rows, but no total for them.

Change: Show a total for the filtered rows.

Company card tab: Sample Cafe, Sample Ads Co, Sample Design App; no total (test T7)

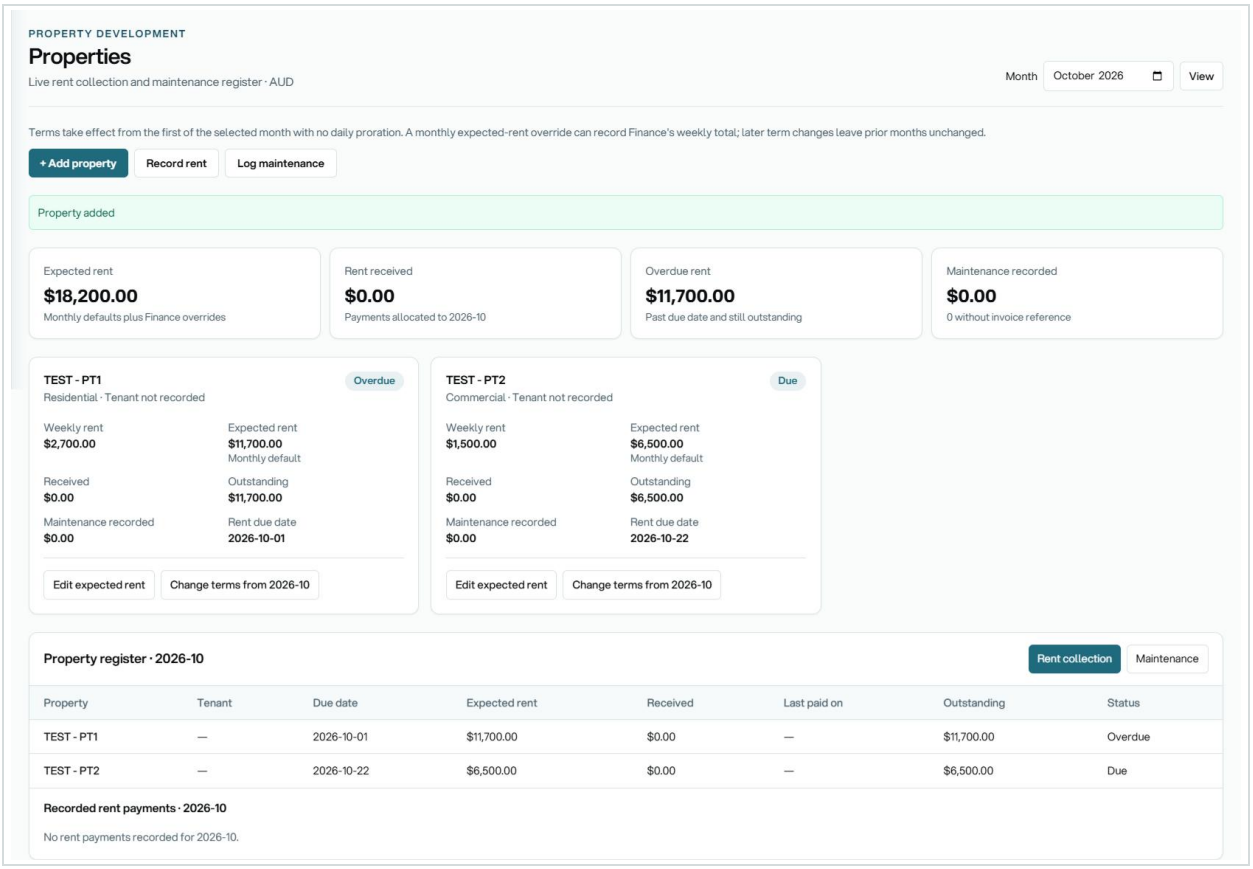

Maintenance list: two jobs ($180 + $220), no total (test T18)

12. Color-coded statuses

Where: Expenses, Properties

Problem: Statuses (Pending, Unknown, Variance Flagged, Due, Overdue) all look the same and blend in.

Change: Colour-code expense statuses (approved, unmatched, amount differs) and rent statuses (due, overdue).

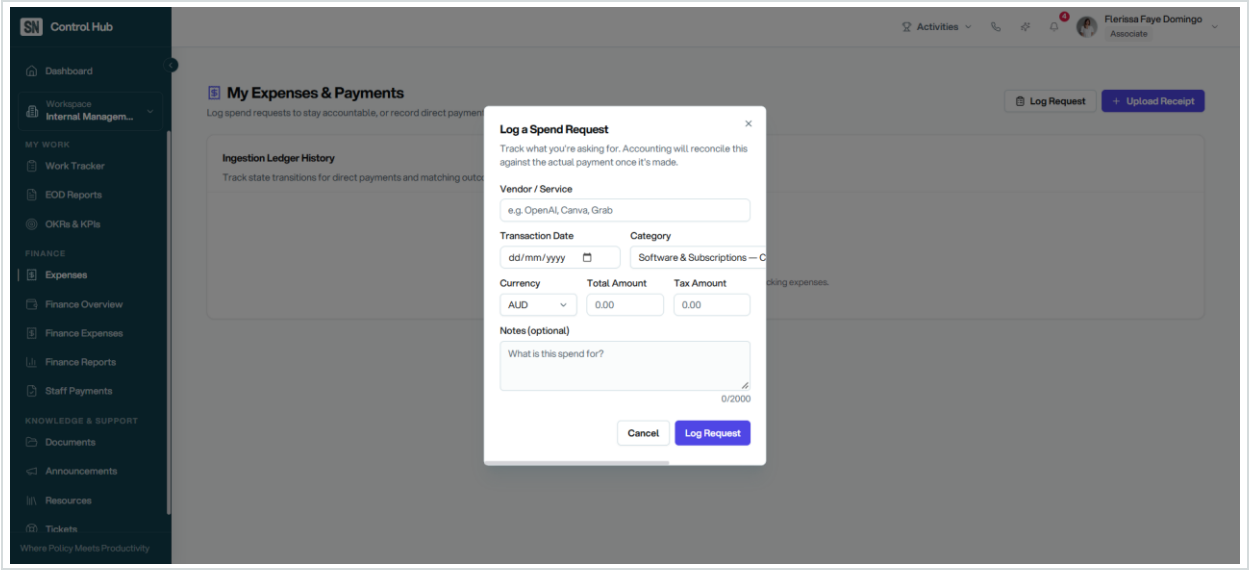

Properties: "Overdue" and "Due" look the same as other text (test T14)

13. Form layout

Where: Log Request, Upload Receipt

Problem: The Category dropdown is cut off and Log Request scrolls sideways. On bulk upload, each receipt's category and Paid with can't be changed after OCR.

Change: Fit the form to the window. Let each receipt's category / Paid with be edited after OCR. Use simpler upload instructions.

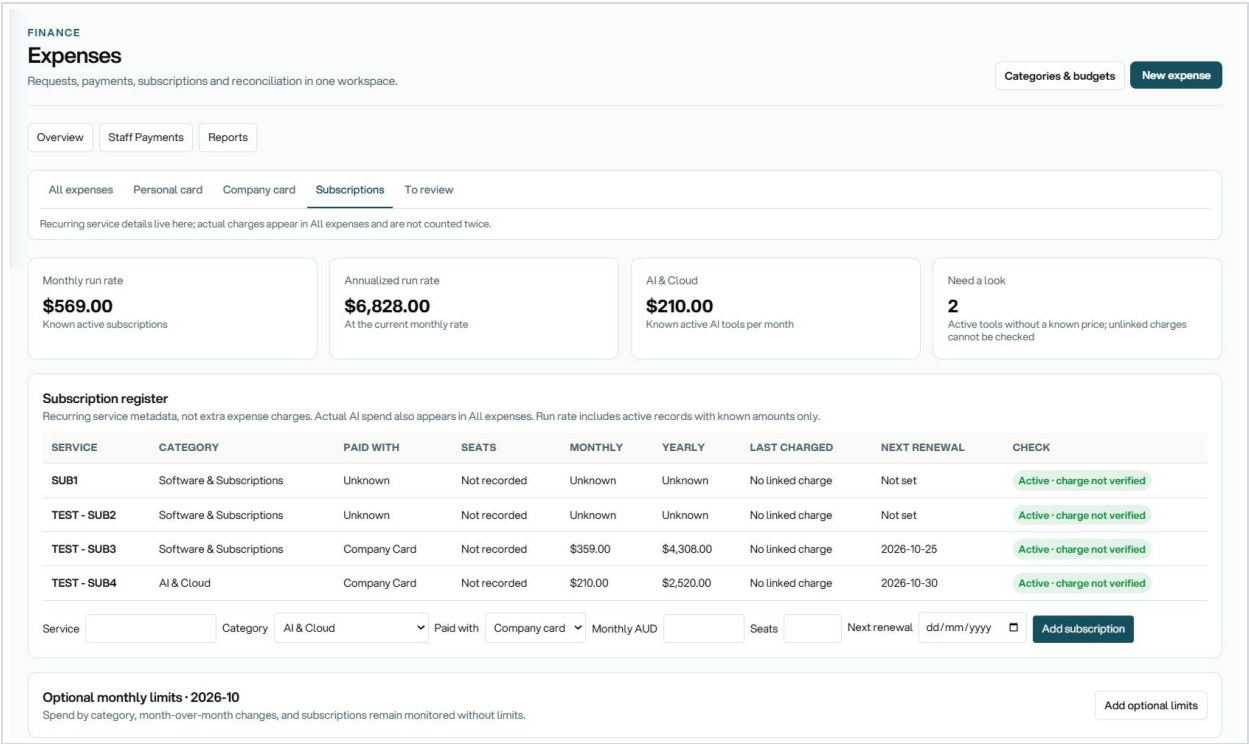

Log a Spend Request: Category field cut off on the right

14. Subscription currency

Where: Finance Expenses › Subscriptions

Problem: Monthly amounts can only be entered in AUD. Many AI tools bill in USD.

Change: Allow a currency per subscription.

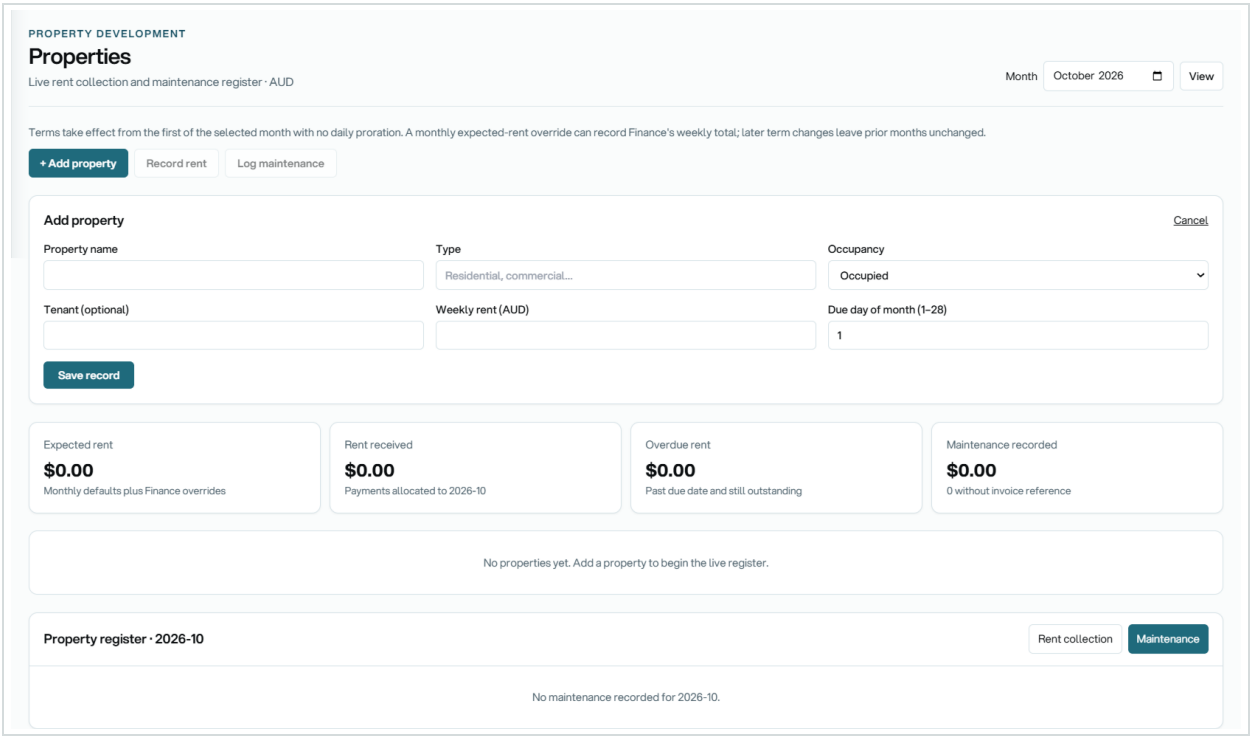

Subscriptions: "Monthly AUD" only. Run rate $569 = SUB3 $359 + SUB4 $210, correct (test T8)

15. More property fields

Where: Property Development › + Add property

Problem: Add property only has name, type, tenant, weekly rent and due day.

Change: Add property ID (P001…), agent, and the account rent pays into. Allow weekly or biweekly rent.

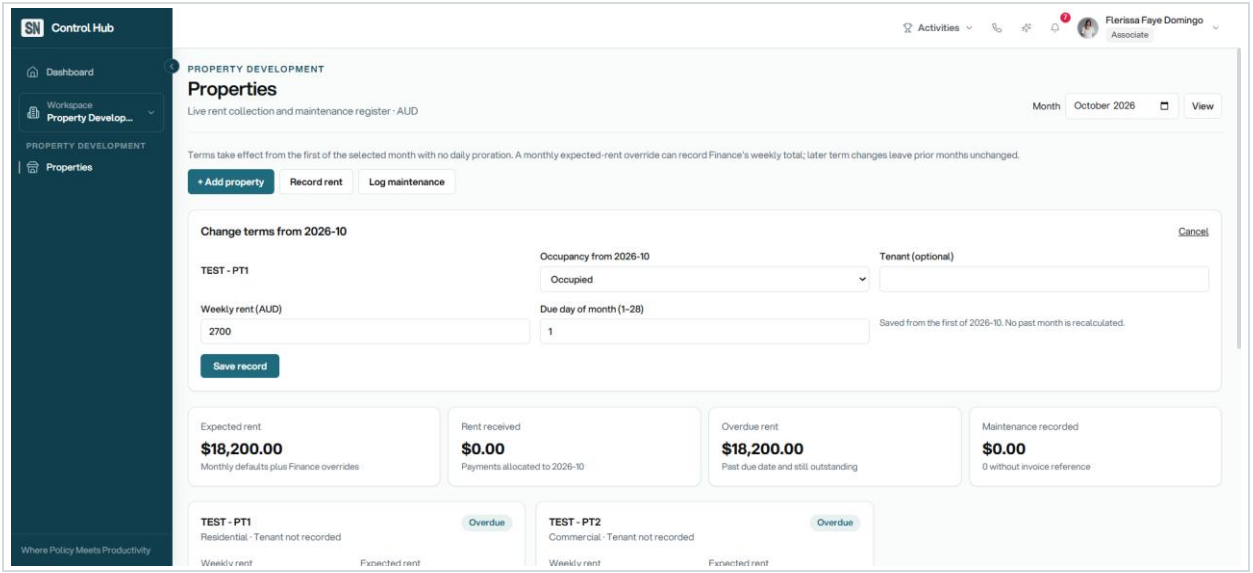

Add property form today

16. Pop-up opens off-screen

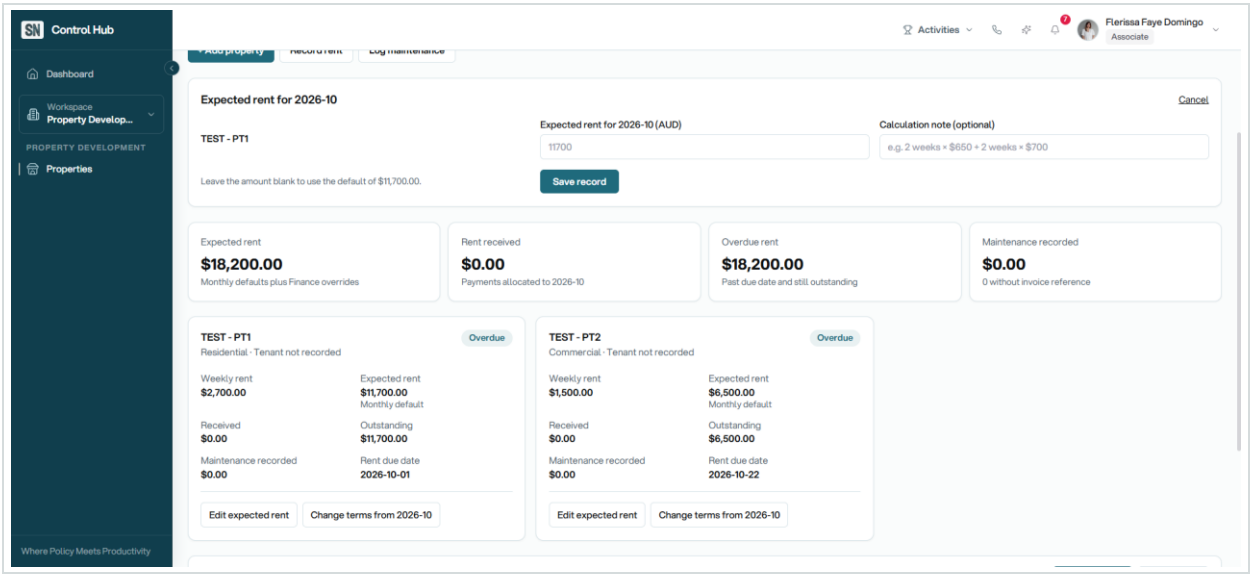

Where: Property Development › Properties

Problem: Clicking "Edit expected rent" or "Change terms" on a property card opens the form at the top of the page. If you've scrolled down, nothing seems to happen and the page looks frozen until you scroll up.

Change: Open the form next to the property card, or as a centered pop-up.

"Change terms" form appears at the top of the page, above the cards (test T13)

"Edit expected rent" form, also at the top (test T13)

17. One date format

Where: Everywhere

Problem: Dates are mixed: 2026-08-30, Oct 21, 2026, 10/2/2026.

Change: Use one format, e.g. 30 Oct 2026.

Clean-up

Summary of test records to delete:

- ☐ Expenses: every record starting "TEST" (requests and uploaded receipts, Oct 2026)
- ☐ Expenses: L1 TEST – Sample Airline, AUD 820.50, 10 Oct 2026
- ☐ Expenses: SAMPLE STATIONERY CO, AUD 45.60, 20 Oct 2026
- ☐ Subscriptions: TEST – SUB2, SUB3, SUB4, and SUB1
- ☐ Property Development: TEST – PT1, PT2 and PT3, plus their rent payments, maintenance jobs and expected-rent override
- ☐ Check Overview counts are back to: 6 requests to match, 1 amount difference, 1 pending approval, 29 submitted invoices
